

Here are your **complete, clean, exam-ready lecture notes (Lectures 19–21)** written in proper structured style 📌

Lecture 19: Meta Ads Manager

Overview

◆ **Introduction**

Meta Ads Manager is the official advertising tool of Meta Platforms used to create, manage, and analyze ads across:

- Facebook
- Instagram
- Messenger
- Audience Network

👉 It is the **central control panel for digital advertising on Meta platforms**.

◆ **Structure of Meta Ads Manager**

Meta Ads Manager works in **3 levels hierarchy**:

1. Campaign Level

- Define the **objective (goal)**
- Example:
 - Traffic
 - Engagement
 - Conversion

👉 Focus: *What do you want to achieve?*

2. Ad Set Level

- Audience targeting
- Budget & bidding
- Ad placements
- Schedule

👉 Focus: *Who will see your ad & how much you spend?*

3. Ad Level

- Creative elements:
 - Image / Video
 - Caption
 - Headline
 - Call-to-Action (CTA)

👉 Focus: *What your audience sees*

◆ Key Features

Performance Dashboard

- Reach
- Impressions
- Clicks
- Conversions

Audience Targeting

- Interests, behaviors
- Custom audiences
- Lookalike audiences

Budget Control

- Daily budget
- Lifetime budget

Analytics & Optimization

- Track performance

- Improve ads based on data
-

◆ Importance

- Precise targeting
 - Full budget control
 - Real-time tracking
 - Scalable for all business sizes
-

Lecture 20: Campaign Objectives in Meta

Campaign objectives define **the purpose of your ad campaign**.

◆ 1. Traffic Objective

Goal:

Drive users to:

- Website
- Landing page
- App
- Messaging apps

Optimized For:

- Link clicks
- Landing page views

When to Use:

- Promote blogs
- Increase website visitors
- Product page traffic

✓ Example:

“Visit our website now”

♦ 2. Engagement Objective

🎯 Goal:

Increase interaction with your content

📌 Types of Engagement:

- Likes 👍
- Comments 💬
- Shares ➦
- Video views 🎥
- Page follows 👤

📊 Optimized For:

- Post engagement
- Video views
- Page likes

📌 When to Use:

- Build brand awareness
- Grow social media presence
- Viral marketing

✓ Example:

“Like, comment, and share!”

♦ 3. Conversion Objective

🎯 Goal:

Encourage users to take **valuable actions**

Actions:

- Purchase 
- Sign-up 
- Add to cart
- Download

Requirement:

- Must install **Meta Pixel** on website

Optimized For:

- Conversions (sales, leads)

When to Use:

- E-commerce stores
- Lead generation
- Sales campaigns

Example:

“Buy now and get discount”

◆ **Comparison Table**

Objective	Goal	Best Use Case
Traffic	Website visits	Blogs, landing pages
Engagement	Interaction	Brand awareness
Conversion	Sales/Leads	E-commerce, services

◆ **Strategy Tip**

- Start with **Engagement/Traffic**
- Move to **Conversion campaigns** after collecting data

Lecture 21: Audience Targeting

◆ Introduction

Audience targeting means **selecting the right people** to show your ads.

👉 The success of ads depends heavily on targeting.

◆ Types of Audience Targeting

◆ 1. Custom Audiences

Definition:

A **custom audience** is a group of people who already interacted with your business.

Sources:

- Website visitors
- App users
- Customer email list
- Facebook/Instagram page engagement

Example:

- People who visited your website in last 30 days
- People who watched your videos

Benefits:

- Highly targeted
- Higher conversion rate
- Retargeting opportunities

👉 These are **warm audiences** (already know your brand)

♦ 2. Lookalike Audiences

Definition:

A **lookalike audience** is a group of new people similar to your existing customers.

How it Works:

- Meta analyzes your custom audience
- Finds people with similar behavior, interests, and demographics

Example:

- People similar to your buyers
- People similar to your website visitors

Size Range:

- 1% (most similar, high quality)
- Up to 10% (larger but less precise)

Benefits:

- Reach new potential customers
- Scale your business
- Improve ad performance

 These are **cold audiences** (new users)

♦ Custom vs Lookalike (Quick Comparison)

Feature	Custom Audience	Lookalike Audience
Type	Existing users	New users
Data Source	Your data	Based on your data
Conversion Rate	High	Medium to High

◆ Targeting Strategy 💡

1. Start with:
 - Engagement or traffic campaigns
 2. Build:
 - Custom audiences
 3. Expand:
 - Use lookalike audiences
 4. Optimize:
 - Move to conversion campaigns
-

◆ Final Summary

- **Meta Ads Manager** → Tool to run ads
- **Campaign Objectives** → Define your goal
- **Audience Targeting** → Decide who sees your ads

👉 Success formula:

Right Objective + Right Audience + Good Ad Creative = Profitable Campaign

If you want next step, I can:

- Create **MCQs / exam questions**
- Give **real campaign setup steps**
- Or share **practical examples from real businesses**
